SECRET

UNITED STATES GOVERNMENT

Memorandum

TO : Chief, EE Division   DATE: 3 December 1962

ATTN : EE/SA

FROM : Chief, Training Assistance Staff, Operations School

SUBJECT: EEFIS Training Material for Salzburg

    1. Attached is a copy of "The Fingerprint Identification System," for transmittal to Salzburg to be used in the training of unilateral agents. The fingerprint system is not in itself classified, but in view of the sensitivity of the operational use for which it was designed, the paper has been restricted to OFFICIAL USE ONLY and should be accorded careful handling.

    2. Your attention is invited to the portion beginning with paragraph 45 (p. 42), which describes the type of viewers suitable for reading prints. Viewers such as those illustrated in Figures 85 and 86 should be obtainable commercially in the field. We are asking the Domestic Training Station to give or lend us ten each of the numerical and literal "crutches" and any other training aids (except slides - see below) they consider necessary. These will be forwarded to you upon receipt.

    3. A set of Vu-Graph slides was sent to SWPE in October 1961, under cover of OFDS-507, for retention by and we suggest that the Station borrow this set. We believe that to obtain a set from Domestic Training Station would be costly and time-consuming, since it probably would have to be made up especially for this project.

    4. CI/OA concurs in the release of the document referred to in paragraph 1 above, with the following stipulations:

        a. That it may be shown to trainees under the supervision of a staff officer;

        b. That it will be handled as a sensitive document;

        c. That the foregoing stipulations will be included in the dispatch transmitting the document to the field.

SECRET

5.   Please furnish a copy of the transmittal dispatch to TAS/OS/TR, GD-5309, for record purposes.

FOR THE DIRECTOR OF TRAINING:

APPROVED:

CI/OA
